

# Scan & View II

## Document Imaging Appliance

### Why Choose the Scan & View II Document Imaging Appliance?

**Imaging Appliance Simplicity** - Turn-key Document Imaging Appliance design means the Scan & View II is extremely easy to install and support. Other products require configuring the Server, installing a Database (SQL) then installing the document management software and associated clients on user workstations.

**Cutting Edge Technology** - Scan & View II utilizes the latest technology including "Embedded" Windows XP Pro operating system for maximized performance and stability. The Scan & View II Document Management Software was developed from the ground up as Web based solution utilizing the very latest Internet development tools.

**Redundant Data Backup** - Protect your clients information with Scan & View II's automatic Image and Data backup. The Scan & View II maintains an internal backup copy of all images and the SQL database. The Scan & View II, two level backup technology is much superior to other products that either provide RAID backup only or no backup at all.

**Scalable Solution** - The Scan & View II is scalable from the basic 10 user emedded system to a SQL2000 Server based product. Ther are also no penalties for scanning volumes or the number of images being processed by the system. The Scan & View II will process 1,000 or 10,000 images per day without requiring any changes to the basic configuration.

**BatchScan and VirtualScan** - The Scan & View II includes both BatchScan and VirtualScan for extremely powerful and productive document input from all sources. In addition, Bar Code technology costing thousands of dollars is also included for automated Indexing and Document Capture. Document image input with Bar Code indexing from high speed production scanners, digital copiers (MFD) or Image Import makes the Scan & View II the most powerful turn-key Document Management solution in the industry. It also includes the BarCodePrint module to automatically create Bar Code Job Control sheets from imported data.

**Feature Packed Solution** - Image Viewing from the Web with thumbnails, annotations, hyperlinking, printing, faxing, and emailing without time consuming setup on Client workstations. Scan & View II includes Enable for Image Enabling Host Applications and Electronic Print Driver that converts Word, Excel, and other documents to TIF images and stores directly to Scan & View II image repository.

#### **And most importantly, the Best Value in the Industry!**

The Scan & View II Document Imaging Appliance provides the most value of any comparable product in the industry - which means a quicker ROI and a workable Cost Justification for you organizations!

The Scan & View II is the most powerful and affordable turn-key Document Imaging Appliance available with built-in Bar Code Indexing Technology!
