Scan Engineering Sized Drawings Direct to Your PC

Aperture Card/35mm Microfilm Scanner and Printer

Affordable solution for engineering size documents stored on aperture cards and 35mm microfilm. The ScanPro 500 is easy to use. You can view and scan an entire image on an aperture card or on 35mm roll film and the scans can be enlarged on the computer monitor for detailed viewing and for printing to large format paper. And, you can e-mail and save to CD-ROM right from your PC.

What people are saying about the ScanPro...

"The ScanPro 500 was a very easy install. We used the (ScanPro 500) to scan several aperture cards. Results were good with a wide range (of aperture card) image quality. I found the Software easy to use, and printing to our Oce plotters was (also) easy."
- AA Blueprint Company Inc. - Tom Rollins, Akron, OH

"I really like this machine...(it is) a wonderful blend of technologies in a practical easy to use format.
- Adams County Library - E Stephen, Thornton, CO
