

Eye Com Check Encoders

The reliable, easy-to-use Desktop Check Encoders from Eye Com.

EC-3500 Exception Item Encoder

Unique Features

- Provides the most flexible, economic method for MICR encoding with a footprint of only 16" by 10".
- There are 8 Field keys available, each field can contain up to 20 columns and can be placed anywhere on the MICR line.
- Printer is optional

EC-4000 Batch Encoder

Unique Features

- Designed with operator ergonomics optimized. Complete relief of stress increases operator concentration and productivity.
- Well established financial software provides batching and ticketing capability along with grand totals for the end of each activity cycle.
- A unique error-eliminating Proof Encode software is standard, as is Simple Batch encoding
- Printer included
- **OPTIONAL SOFTWARE AVAILABLE:** This includes "teller recall" for multiple operator summaries and "smart key" for simultaneous, multiple field, data entry.

Standard Features for the 3500 and 4000

- Two retaining areas for work in progress, checks can be seen at all times.
- Open frame check channel decreases mis-feeds, increases productivity.
- Built-in catch tray, maintains orderly stack of checks, saves counter space by reducing overall footprint.
- Oversized, backlit display for ease of reading, (40 column, 2-line array, command line and data line).
- Ergonomically inclined keyboard with supporting palm pad, this eliminates stress from the operator's wrist at all times during processing of checks.
- Easy loading, high yield, cassette ribbons come standard. These, combined with a lifetime steel hammer, maximize operator processing time.
- Keyboard programming provides: programming changes, parameter print alignment and component diagnostics for easy technical evaluation.
- Encoders are USA made.
